

LOAD CONTAINMENT (CARGO) NETS IN MINING

Load Containment on vehicles, is a legal requirement!

Across the many areas of mining operations where OXLEY NETS has a strong involvement, the area of Load Containment on vehicles is one of the most important.

The traffic authorities 'Load Restraint Guidelines' dictate that ... 'all loads on vehicles must be contained'. So whether your vehicle is carrying a full load of equipment or just a small tool box – you need to have your 'load' contained.

OXLEY NETS range of 'Truck, Trailer & Ute Nets':

- Can solve the problem of containing any vehicle load

- Can help you avoid the hefty fines involved with poor containment
- Can provide a robust and economical containment solution
- Can be supplied in a range of standard sizes
- Can be manufactured by us in custom sizes

- Pallet Rack Netting
- ... and any Sports Facility Netting.

With qualified design and engineering professionals on staff, OXLEY NETS welcomes the challenges of understanding a client's unique safety requirements, and developing solutions to address the issues being confronted.

And as well as helping address the safety issues associated with load containment, OXLEY NETS can assist with:

- Fall Arrest Nets – for working at heights
- Mine Conveyor Nets – to capture spillage
- Dam Cover and Pond Egress Nets
