

OXLEY NETS Information Sheet

Safety Nets

Construction and Industry

OXLEY NETS can provide a range of solutions to your specific need for Safety Netting. Utilised in Construction, Industrial & Mining applications, these Nets all conform to the European Standard EN 1263-1 – the default international standard.

Construction Industry - Void Safety Netting

Semi-Trailer Fall Arrest Netting

Safety Netting provides the necessary personal protection against injury or death from falls, as well as the protection for others from falling equipment and debris.

Mining Industry - Safety Netting at work

At OXLEY NETS, we have the product range and the experience, to

- ✓ Provide a number of suitable Safety Net options, for each specific application.
- ✓ Supply various Safety Net attachment options to suit.
- ✓ Provide advice on the Netting design and installation, to optimise your business's operational efficiency.

OXLEY NETS Information Sheet

Safety Nets

Rail Maintenance

OXLEY NETS can provide a solution to the 'Working from Heights' Risk associated with train carriage and locomotive doors being open during periods of workshop maintenance or cleaning.

Working from Heights

Open Door Safety Nets = NO FALL

Fitted Open Door Safety Nets = Risk Isolation

Open Door Safety Nets provide the necessary personal protection against injury or death from falls, by barricading the door opening, and eliminating the possibility of falling to the workshop floor.

Safety Net fixed to locomotive door

OXLEY NETS Rail Maintenance Safety Nets

- ✓ Feature a minimum of 4 'strap' attachments to the vertical handrails of the passenger cars or locomotives.
- ✓ Feature 170kg Break Load (per strand) Netting, with rigid encapsulated aluminium side supports.
- ✓ Can be custom developed to suit the size of most passenger car or locomotive door applications.
